

# YOUR 5-POINT **CYBER RISK** ASSESSMENT CHECKLIST

Don't wait for a cyberattack to expose your vulnerabilities. Be proactive and use this 5-point checklist to evaluate and strengthen your cybersecurity posture.

1

## **IDENTIFY WEAKNESSES**

Find the gaps and potential threats in your IT landscape that could compromise your business.

2

## **ANALYZE RISKS**

Evaluate the impact of potential risks on your business operations.

3

## **PRIORITIZE RISKS**

Fix the most critical issues first.

4

## **TAKE ACTION**

Implement a comprehensive mitigation strategy to strengthen your defenses.

5

## **REVIEW & MONITOR**

Regularly check for new threats and improvise your strategy accordingly.

**Hulp van een expert nodig?**

Laten we samen uw cyberbeveiligingsrisico's beoordelen en de flexibiliteit van uw bedrijf versterken..
